

Introducing HELIXintel's online platform for equipment tracking

By Tiffany Woods

WCIA has obtained, through Hartford Steam Boiler Inspection and Insurance Company (HSB), a free value added service for all members to HELIXintel's online platform. This system will allow all WCIA members to track their equipment such as boilers, HVAC, etc. For members with Equipment Breakdown coverage through HSB your jurisdictional inspection equipment data, mapped to its specific property location, has already been preloaded into HELIXintel. Members may also add any additional equipment to the system for internal tracking. HELIXintel is not part of the WCIA property or Equipment Breakdown coverages; instead HELIXintel is a way for your facility managers to track equipment, increase equipment uptime and lifespan, have access to incentives such as industry rebates, etc. all at no cost to you!

Please share this information with your facility managers and have them register for one of the upcoming webinar trainings on [September 27, 2023](#) or [October 4, 2023](#).

Contact Tiffany Woods, Programs and IT Coordinator, at tiffanyw@wciapool.org, if you have any questions.
