

Origami member dashboard update

By **Tiffany Woods**

This month, the default dashboard members see in Origami will have a new look. The dashboard will be arranged in panels organized by function. The panels will contain instructions on how to navigate through the system. In addition, WCIA will be moving the Evidence of Coverage Letters into Origami. Members will now request the letters through Origami and once WCIA processes your request you will be able to download and print or email your letters to the requestor. More information and instructions will follow via email to the WCIA delegates/alternates and the Origami users. For questions about the Evidence of Coverage Letters please contact [Tiffany Woods](#).
