

Fleet and Driver Improvement Program rollout

By Patti Crane

WCIA believes that training is a key component for fostering a culture of risk management within an organization. To reduce driver-related incidents and help mitigate risks associated with auto liability exposures, WCIA has rolled out a Fleet and Driver Improvement Program which includes the following programs:

- **Evergreen Safety Council Online Defensive Driving**
A two-hour on-demand course available 24/7.
- **Evergreen Safety Council In-Person Defensive Driving**
A new four-hour, on-site, instructor lead course.
- **NW Safety Consultants - Driving Simulator**
A virtual reality motion simulator course providing diverse driving techniques through varying computer simulation.
- **NW Safety Consultants - Driver Skills Course**
A behind the wheel course, in a controlled area to allow drivers to practice specific vehicle techniques.

If you missed the opportunity to register for any of these trainings, stay tuned as these programs are offered again in 2023! Special attention will be given to members with automobile loss trends.
